PETER SCHOFFELEN

Dallas, TX | peter.schoffelen@gmail.com | linkedin.com/in/peter-schoffelen | github.com/pschoff

SUMMARY

Program leader who both deploys AI at enterprise scale and builds with it daily. Rolled GitHub Copilot across a Fortune 500 engineering organization for a 20% productivity gain — and has used Copilot as a daily build tool for two years to ship working software: generation agents, LLM-queryable research systems, and automated forecasting and KPI dashboards. 10+ years owning strategic, ambiguous, cross-functional programs across consulting, autonomous vehicle R&D, and global enterprise environments, with executive presence built from delivery teams through C-suite and board.

AI: HANDS-ON PRACTICE

- **NYT Recipe Optimizer (personal build, public repo) —** Built and shipped an independent tool that scrapes NYT recipe data, extracts nutrition information, and generates macro-targeted meal plans. github.com/pschoff/NYT-Recipe-Optimizer
- **Personal site development —** Uses AI coding tools to build and maintain a personal GitHub Pages site (github.io), iterating on design and functionality directly in code.
- **Multi-agent product workflow —** Contributing member of a team building a native agent suite spanning ideation to implementation — research, competitive analysis, architecture, and experience design agents — compressing the path from concept to buildable specification.
- **Repository knowledge graphs —** Partnered with engineering to introduce JSON knowledge-graph mapping of repositories, giving coding agents richer codebase context and improving output quality on complex changes; drove adoption across teams.
- **Custom generation agent —** Built a PowerPoint generation agent enforcing a full design system, producing materially higher-fidelity output than out-of-the-box tooling.
- **LLM-queryable research corpus —** Designed and rolled out shared knowledge vaults, then drove product-team adoption of centralized customer interview transcripts — reducing research synthesis from days to hours.
- **Analytics and forecasting —** Built AI-assisted KPI reporting and financial forecasting dashboards supporting budget analysis and executive decision-making.

PROFESSIONAL EXPERIENCE

Engagement Lead (Associate Director) | Publicis Sapient | Dallas, TX*2025 – Present*

- Senior client-facing leader for a Fortune 500 engagement portfolio, owning executive relationships from C-suite through delivery teams across strategy, governance, and commercial outcomes
- Deployed GitHub Copilot across engineering teams — led change management strategy and adoption sequencing, achieving 20% productivity improvement
- Owned end-to-end design of an AI/ML Sales Order Automation program: built the business case, aligned cross-functional stakeholders, and established delivery governance across four continents
- Drove $4M in incremental revenue through pipeline development, contract negotiation, and cross-sell positioning
- Managed integrated release plans for 40+ engineers across parallel workstreams, maintaining dependency mapping and executive reporting through the full program lifecycle

Manager, Agile Program Management | Publicis Sapient | Dallas, TX*2021 – 2025*

- Owned delivery of a $50M B2B commerce platform transformation across 30+ engineers spanning data migration, feature development, and platform integration on four continents, with full P&L responsibility
- Identified and structured the AI-driven Sales Order Automation business case and governance framework, positioning the program for $1B in projected annual labor cost savings
- Cut UX redesign cycles 70% by redesigning the Engineering–UX collaboration model, eliminating a chronic source of rework and schedule risk
- Drove $6M in annual client revenue through launch of a new brand and loyalty program, owning delivery from strategy through implementation

Senior Program Lead, Autonomous Technology Group | Daimler Truck | Portland, OR*2019 – 2021*

- Owned cross-team program delivery for a first-of-its-kind autonomous trucking R&D effort, orchestrating planning and execution across six engineering teams in an environment with no established playbook
- Scaled the engineering organization from 12 to 70+ engineers while maintaining delivery velocity — designing team structures, operating cadences, and governance frameworks to support rapid growth
- Trained 100+ employees on new ways of working; recruited and developed two junior program leads; built JIRA-based program infrastructure with custom executive dashboards

Senior Data Analyst | Daimler Truck | Portland, OR*2018 – 2019*

- Identified $14M in operational cost savings through predictive analytics and process optimization, delivering insight to senior leadership via a custom BI platform built in R, SQL, Tableau, and Alteryx
- Led DTNA's first predictive analytics initiative — forecasting vehicle malfunctions; results drove expansion to three additional analytics programs

Inspire Leadership Lab — Executive Development Program | Daimler Truck | Portland, OR*2016 – 2018*

- Selected for Daimler Truck's competitive executive development program; rotated across four business units with C-suite mentorship and board-level exposure
- Presented strategic partnership feasibility and business model analysis directly to the Daimler Truck CEO and Board of Directors
- Won internal innovation competition pitching a computer vision and ML solution for infrastructure assessment — secured development resources and a multinational proof-of-concept partnership

EARLIER EXPERIENCE

Researcher, Birchmere Ventures (2015) — Research contributor to The Science of Growth (Sean Ammirati); incorporated into Carnegie Bosch Institute executive education and two CMU graduate courses

Co-Founder, Small Change (2014–2015) — Co-founded a real estate impact investing platform; built the Triple Bottom Line metrics framework; secured $20K seed funding

Coro Fellow, Coro Fellowship in Public Affairs (2013–2014) — Selective cross-sector leadership fellowship; developed an equity ownership model for a $20M development with the Richard King Mellon Foundation

EDUCATION

MS, Information Systems Management (Business Intelligence & Data Analytics) — Carnegie Mellon University, Heinz College

MS, Public Policy and Management — Carnegie Mellon University, Heinz College

BA, Political Science, Minor in International Economic Development — Seattle University, Cum Laude

SKILLS & CERTIFICATIONS

AI & Technical: GitHub Copilot (2 yrs daily build use) · Agent development · AI prototyping & experimentation · Prompt & context engineering · Knowledge graphs · RAG / LLM-queryable knowledge systems · Dashboard development · Python · SQL · R · Tableau · JIRA

Program & Leadership: End-to-end program delivery · Cross-functional leadership (Product, Engineering, Marketing, Sales, Customer Success) · Executive stakeholder management · Operating in ambiguity · Dependency & risk management · Change management & adoption · Developer productivity & tooling · P&L management · Business development

Certifications: PMP · Prosci Certified Change Practitioner · SAFe 6 Program Consultant (SPC) · SAFe 6 Agilist · Certified ScrumMaster
